INFO-F-307 – Génie logiciel et gestion de projets – Groupe 5

Première itération

Nous avons choisi pour la première itération de réaliser l'histoire numéro 3. Nous la réalisons en sa totalité en considérant que l'utilisateur ne peu avoir qu'une liste de shopping à la fois. Voici une découpe de celle-ci :

Story number: 3 Group number: 5

Title: Shopping list

Description: A user can make a shopping list. The user can just enter products and as such make a list. This list is saved and can be edited later on.

The user can also make a shopping list based on one or several recipes. By selecting one or multiple recipes out of a list of recipes, the ingredients of these recipes are assembled in a shopping list by the application. The user can edit the shopping list, e.g., to remove ingredients that (s)he still

has at home.

Difficulty: 1 2 3
